

PACKING YOUR CASE SAFELY FOR SHIPMENT

Please wrap **each** individual disinfected model and impression with bubble wrap and please keep the completed RX separate from the models. Please include:

- Completed RX
- Impression (s)
- Opposing model (upper and lower)
- Bite Registration
- Shade (if photos were taken please email them to me: dan@optimalmodel.dental)
- Study model (If applicable)
- Implant Information and parts (If applicable)
- Other pertinent information for each individual case

Please remember that your patient's impressions and models are all that we have to work with. In order to ensure that your models make it here safely, please do the following:

- Wrap **each** model with adequate amounts of packing material
- Wrap all bites separately
- Box or bag small items to ensure they are seen
- Place more material around all items in box to secure them tightly and safely
- Close the box and do the **shake test** (shake the box: If anything rattles/shifts add more packing material).

After the box is ready with your case(s), please place box in a Fed-Ex Express bag (if you have one and the box fits), fill out your name and address on the FROM column of our pre-printed Fed-Ex Express label we provide you and affix the label to the outside of the bag or box securely. If you do not have a label please reach out to us so we can scan and email you a label: (406) 224-1963.
